PURPOSE

To adopt the 2025 Water and Sewer Fund budget.

BACKGROUND INFORMATION

The proposed 2025 budget for the Water and Sewer Fund is \$170,189,500, about 3% higher than the original 2024 budget. The budget includes a \$20 million transfer to the General Fund for the Rate Stabilization Account. Revenues and expenses (excluding the Rate Stabilization transfer) are balanced at approximately \$111 million, with about half of that amount going toward debt service. A number of significant needs could not be funded within that amount. Specifically, an expansion of the funding for on-demand repair contracts for large jobs and the purchase of equipment for in-house crews to handle the smaller ones had to be left out. One way to restore those cuts would be via a 5% rate increase, effective in January 2025. It is important to our bond holders and rating agencies that we maintain equilibrium between current-year revenues and expenses, which we have done with this budget.
