**PURPOSE**  
To adopt the 2025 budget for the TIF District covering the eastern part of the Medical Corridor

---

**BACKGROUND INFORMATION**  
Earlier in 2024, the Council created the Health Care and Technology Innovation District East TIF District, as well as the fund where its revenues and expenses will be tracked. This ordinance appropriates a token amount of \$20,000 for 2025, with that number likely to change as we receive more data on tax collections. The estimated revenue is all appropriated into a Reserve account until we get a better handle on how much money is being generated and more definite plans for spending it are developed.
